The Most Powerful & Efficient Transportation Software to Meet Your Routing Needs

Your Complete Transportation Routing System Solution Company

Trans-Sync™
Routing, Redistricting & Reliability

Trans-Sync™ goes the extra mile to be the most efficient routing system that will take you where you need to go.

- Seamless integration with your Student Information System (SIS), Trans-Sync™ handles all the complexities of making sure your routing system is always up-to-date.
- An intuitive user interface that requires minimum training.
- A cloud based product that requires no installation of software or setting up of servers. You can access your routing system anywhere there is an internet connection.
- The industry's first calendar based routing system, allowing you to handle complex student pickup/drop off schedules including split custody and daycare.
- Advanced computer algorithms make route creation and student assignment fast and easy. Creates bus schedules for thousands of students in minutes.

- Communicate with drivers, parents, and school staff effortlessly using real-time text and email communications.
- A parent portal that allows updates to address and contact information and making transportation change requests.
- Transparent pricing based on number of active buses used, with unlimited licensing.
- A built-in address validation tool to ensure correct addresses are entered into the system.
- Integrates with all major GPS devices to allow you to see planned and actual routes.
- On-the-fly route consolidation function to handle unexpected driver absences.
