**AIMS™**

Academic Intervention Management System

The Academic Intervention Management System (AIMS™) is your complete AIS/Rtl program that facilitates eligibility, academic identification, intervention enrollment, notes, and production of the required letters of notification, quarterly progress reports, and letter of ending of services. It is designed to provide each school and/or district with a system to manage and monitor the implementation of Commissioner's Regulations requiring Academic Intervention Services (AIS) to supplement the instruction in the general curriculum and assist students in improving performance. It provides a central database containing all required AIS/Rtl elements, as well as the regulations and guidelines, and links the NYS Next Generation Standards to student goals.

AIMS™ maintains a student's AIS/Rtl record and keeps it archived across the student's educational career. All data is archived for 27 years as required and student enrollment and demographic/program information are kept correct using EVI's DataSync™ Tool that links to any Student Management Systems (SMS).

AIMS™ includes descriptions of district criteria for determining AIS/Rtl eligibility and/or diagnosis with levels of intensity, descriptions of all instructional academic interventions, instructional strategies, parental interventions, and support services. Now with a robust, complete, and coded Social Emotional Learning (SEL) process included.
