DataMate™

Student Assessment & Management Platform

edvistas.com

DataMate provides superintendents, administrators, and teachers alike with the tools, system visibility and reliable analytic data they need to greatly improve performance and instructional effectiveness. All from one easy-to-use platform designed to get better results while saving time, money and resources.

Seamless Integration with any SMS

Our proprietary DataSync™ Tool links to any SMS and keeps enrollment and course/section/homeroom assignments current. Districts can choose to upload their own test questions, purchase commercial item banks, or simply use EVI's more than 60,000 preloaded test questions to create assessments for paper (PBT), computer (CBT), or both.

Compliant with NYS Standards

EVI's 60,000+ item bank includes the last thirteen years of NYS grades 3-8 exams and Regents released items. All are aligned with NYS Next Generation standards with easy, on-demand access to assessment maps, test books, teacher instructions, and more. DataMate also allows practice assessments to be given online in a "Nextera™-like" format with text-to-speech functionality.

One-Click Reporting and Analysis

DataMate™ provides detailed reports and enhanced data analysis with just one click. By instantly connecting to real-time information, educators can identify student challenges and make accurate instructional shifts to improve performance and meet goals.

They can set more accurate instructional targets because the analytics provide insight into what is and is not working at the individual student, classroom, teacher, building, and district level. In addition, custom reports are available as required and users can compare results against other districts, BOCES, and RICs.

Customize Your Own DataMate

DataMate is available in three levels of features and functions. From the free version included in EVI's NYS Scoring and Reporting product, to the "Live" level of enhanced offerings and capabilities, all the way up to the "Elite" package of premium DataMate support. In addition, users can further customize their DataMate platform with options like the "Degrees of Education Power Package" and the Dr. Jean Maculaitis "Dr. Mac Content Suite" for ELA and math.

Your Local NYS Partner

EVI has 30 years of experience and proven success in providing preeminent products and services to over 500 New York school districts. Our experienced staff is here to assist you in developing your own assessment and management program and to benefit from all the great advantages DataMate has to offer.
