# Portfolio (+)

Student Document Management

edvistas.com

## Store. View. Share. All in one place.

Portfolio (+) is our secure communication solution that allows districts to present important and confidential parent reports and student documents. The software is simple to access using a “Single Sign On” feature and is scalable to support schools of all sizes.

## Management System Integration

Portfolio (+) seamlessly integrates with most SMS’s including industry leaders PowerSchool, SchoolTool, and eSchool-Data, creating reports and uploading them directly into a student portal for parents and guardians to review. Administrators and staff can also access the data and can query if a parent report goes unread.

## Saving with Efficiency

Portfolio (+) is a smart and affordable solution that can pay for itself quickly by avoiding costly mailings and traditional school-to-home communications. Our team will work with you to help manage and maximize your district’s savings.

## Features & Benefits

### Streamlined Convenience

Portfolio (+) can increase productivity by exchanging data efficiently using the enhanced API of your school’s SMS. This integration enables districts to display assessments, reports, and documents directly in the student portal. With the single sign-on solution, parents and guardians are able to access all necessary documents and reports for their child. These protocols allow for immediate reporting through a more efficient and streamlined process.

### Security and Integrity

At Educational Vistas, we take the responsibility for the security and integrity of school district information to be the most important part of our service. Portfolio (+) software conforms to all standards, nationally, at the state level, and locally at the district level.

### Paperless Distribution and Archiving

The Portfolio (+) software allows for paperless delivery directly to the parent via portal access and email. This eliminates the need for large-scale printing and distribution and saves a significant amount of time, money, and valuable human resources. All documents are archived for future viewing for multiple years.

### Tailored Messaging

With the Portfolio (+) administration console, Conductor (+), school districts can choose what the student’s parent or guardian sees and customize messages based on their unique preferences. A customized district website message can inform the user of the district’s mission, goals, and expectations. Individual document messages can be customized to provide more specific information.

### Accurate Reporting

Unlike traditional print/mail detail and summary reports, the reports from Portfolio (+) enable administrators to know whether the documents were actually viewed, or if other measures need to be taken to ensure the information reaches the intended party. In addition, phone log reports can be easily integrated into your existing messaging service.

### Your NYS Partner

EVI has 30 years of experience and proven success in providing preeminent products and services to over 500 New York school districts!
