Curriculum Developer™
Instructional Management System

EDUCATIONAL Vistas

Customizable Templates & Process to Meet All District Needs

The Results-Based Education Model (R-BEM) Curriculum Developer™ (CD) is your complete curriculum development, refinement, and alignment system. The proven organizational structure within this product is key to fast implementation and ease-of-use, and consistent delivery.

CD serves as a reference site and management tool for teachers, parents, and administrators regarding what will be taught, assessed, and in what time frame. It is web-based and aligned with NY Next Generation Standards, based on the notion that curriculum is a seamless web: teaching/learning/assessment.

- ☑ Complete "mapping" component for student learning of skills and knowledge
- ☑ Subject and/or course overview with detailed description(s)
- ☑ Full unit of instruction descriptions and timeframes
- ☑ "Year at a glance" overview including assessment timelines
- ☑ Sophisticated unit planning and curriculum framework process
- ☑ Unit details include: concepts, major understandings, teaching points, results, differentiated instruction, duration, and Next Gen links.
- ☑ Framework identifies content, guiding questions, performance tasks, and assessments
- ☑ Formative/summative assessments listed with Depth of Knowledge (DOK) and Next Gen code by item

- ☑ Adaptations for ELL and SPED participation and performances
- ☑ Easy to attach vocabulary lists, needed materials, prior knowledge, and teacher notes
- ☑ A district feedback loop is provided for continuous improvement
- ☑ A complete unit delivery process with pacing guides is included
- ☑ Instruction and activities driven by required results and unit duration
- ☑ Teaching and learning guided by motivation, engagement, and best of practice
- ☑ A lesson plan creation and sharing component is included
- ☑ All lesson planning is based on the instructional frameworks
- ☑ Becomes the repository for the complete, pre-k to 12 district curricula
- ☑ The "attributes of the graduate" starting point allows for design-down and delivery-up
- ☑ Links to any Student Management System (SMS)
- ☑ Can also be linked to additional program data systems
- ☑ Supports multiple types of Single Sign-On
- ☑ Configured and up-and-running in five (5) days or less... guaranteed!
